VEMANA INSTITUTE OF TECHNOLOGY

Approved by AICTE - New Delhi, Affiliated to VTU Belagavi & Recognized by Govt. Of Karnataka
#1, Mahayogi Vemana Road, 3rd Block, Koramangala, Bengaluru - 560034.

Accredited by NBA

DEPARTMENT OF ELECTRONICS & COMMUNICATION ENGINEERING

INTERNSHIP REVIEW - II

Course Name: UX Designer/Game Designer

INTRODUCTION TO THE ORGANIZATION

Edutainer is an educational technology company focused on making technical learning engaging, structured, and practical. The organization blends education with interactive learning approaches, ensuring that complex concepts in Computer Science are easy to understand and apply.

Our Vision and Mission

At Edutainer, we envision a world where education is limitless, inclusive, and always evolving. Our mission is to bridge traditional learning with cutting-edge technology, creating experiences that are accessible, engaging, and impactful.

Values

Innovation

Excellence

Collaboration

Accessibility

Learn → Practice → Apply

Concepts → Understanding → Application → Confidence

LEARNING OBJECTIVES

INTERNSHIP WORKFLOW

WORK DONE DURING THE INTERNSHIP

TOOLS & TECHNOLOGIES USED

Design & Game Experience Tools

- Canva → UI layouts, booklet design
- Flowchart tools → game logic & user flow design
- Diagram tools → system and interaction visualization

AI & Prompting Tools

- AI tools for:
 - Content analysis
 - Idea generation
 - Refinement
- Prompt engineering for controlled outputs

Development & Programming

- C Programming Language → core logic building
- GCC Compiler → program execution
- Code editors & terminal → development environment

Content Processing Tools

- Transcriber software
- Speech-to-text tools
- Used for converting learning content into structured data

Documentation & Publishing

- PDF editors
- Document conversion tools
- Booklet design tools

Version Control & Storage

- GitHub:
 - Repository management
 - Version tracking
 - Structured knowledge storage

Learning & Evaluation Platforms

- YouTube & online platforms → learning sources
- Quiz platforms → skill testing (gamified learning)
- Assignment portals → structured evaluation

LEARNING OUTCOMES & SKILLS GAINED

At the end of the internship, the following learning outcomes were achieved:

- Strong understanding of Computer Science fundamentals
- Ability to break problems into logical steps
- Improved algorithmic thinking & programming logic
- Understanding of UX and Game Design principles
- Ability to design interactive flows & user/player experiences
- Developed analytical thinking & structured problem-solving
- Improved self-learning, documentation & time management

Technical Skills

Algorithmic thinking
Basic programming logic
Understanding of system architecture
Problem analysis and solution design

Analytical Skills

Logical reasoning
Structured thinking
System breakdown approach
Iterative improvement

Professional Skills

Self-learning & discipline
Technical documentation
Content structuring
Time management

Game Design & UX Skills

User/player flow design
Interaction & feedback systems
Gamification thinking
Experience-oriented design

CONCLUSION

The Edutainer internship was a worthwhile educational experience that prioritised structured comprehension, clarity, and logic over rote memorisation.

Major Takeaways

- Ability to think in terms of: Systems (CS), Users (UX), Interactions (Game Design)
- **Improved:** Problem-solving approach, Logical clarity, Independent learning ability

Impact

- Better prepared for:
 - Academic coursework, Future internships, Real-world technical challenges
