

# WEEKLY INTERNSHIP ACTIVITIES & ASSIGNMENT 11

## ACTIVITY:

**Title:** Understanding Iterative Game Development

**Description:** Interns will learn the importance of iteration and how continuous testing improves gameplay.

**Methodologies:**

- Concept mapping
- Case examples
- Process breakdown

**Objectives:**

- Understand iteration cycle
- Learn improvement through testing
- Recognize refinement importance

**Reference/Source Code/Links:**

- [Agile/game dev workflow articles](#)
- [Indie dev case studies](#)

**Deliverable:**

- Diagram of iteration cycle
- Example explaining improvement process

---

## ASSIGNMENT:

**Title:** Implementing Basic NPC AI Behavior

**Description:** Interns will design and implement simple AI behavior for an NPC (e.g., patrol or chase system).

**Methodologies:**

- Scripting
- Logic design
- Testing

**Objectives:**

- Implement AI logic
- Control NPC actions
- Test behavior in environment

**Reference/Source Code/Links:**

- [Godot AI tutorials](#)
- [State machine examples](#)

**Deliverable:**

- Working AI script
- Explanation of logic
